## EDUCATION

---

|  |                         |
|--|-------------------------|
| <b>Faculdade de Ciências da Universidade do Porto and Universidade de Aveiro</b> | <b>2023 – (Ongoing)</b> |
|--|-------------------------|

*Undergraduate – Physics Engineering*

## PROJECTS & EXTRACURRICULAR

---

|   |             |
|---|-------------|
| <b>Visualization and processing of Geochemical Data</b> | <b>2023</b> |
|---|-------------|

- This was a project done in a python course at “Universidade de Aveiro”, to process files with data obtained from the chemical analysis of a set of rock samples collected in the Lamego region (Portugal).

|                                      |                   |
|--------------------------------------|-------------------|
| <b>Coding for automation purpose</b> | <b>University</b> |
|--------------------------------------|-------------------|

- I developed various small software tools to streamline tasks for my classes, such as software to plot graphics and analyze data.

|                |             |
|----------------|-------------|
| <b>Website</b> | <b>2025</b> |
|----------------|-------------|

- The website that I mentioned above is built with React Native, it incorporates React Router and other libraries for sleek and modern design. It was deployed to GitHub Pages.
- Its purpose is to be used as a portfolio and interactive résumé, allowing recruiters to quickly grasp my capabilities and technical skills. It is structured to be both user-friendly and professional, making it easy for companies to evaluate my expertise.

## SKILLS

---

**Programming languages:** Python (Advanced), C, SQL, JavaScript, HTML, CSS, MATLAB.

**Computer software/ frameworks:** React, Git.

**Languages:** Portuguese (native), English (Advanced).
