

Luís Soares

Software Engineer · Physics Engineering Student

luissoares.net · luissoares1031@gmail.com · Castelo de Paiva, Portugal

SUMMARY

Physics Engineering student with a genuine passion for software. I build things because I love it, not just to fill a portfolio. Self-taught across the full stack, comfortable with Linux, Python, React, and the infrastructure in between. Someone who picks things up fast, takes pride in understanding how things work, and is eager to prove what I can do in a professional environment.

PROJECTS

Jarvis — Personal AI Assistant

2026 – Present

Personal Project · github.com/Luissoares11/jarvis · github.com/Luissoares11/jarvis-ui

- Fullstack desktop app: Electron + React frontend, Python/FastAPI backend self-hosted on Ubuntu Server (Proxmox VM), accessed remotely via Tailscale.
- LLM-powered intent parsing (Claude Haiku) with SQLite caching; features include persistent memory, task/reminder management, calendar, real-time weather and football data, and a SymPy computation engine.
- Originally built to improve Physics Engineering coursework such as instant symbolic computation (derivatives, integrals, function analysis via SymPy). Then expanded into a full personal assistant with memory, tasks, calendar, and real-time data.

Personal Portfolio Website

2025 – Present

luissoares.net · github.com/Luissoares11/website-luis

- Built to give employers a real sense of who I am beyond a CV. It showcases my projects, background, and personality in one place.
- Developed with React and React Router and deployed to GitHub Pages. Includes a vertical timeline, project cards with README popups via React Portal, and a clean responsive layout.

EDUCATION

BSc Physics Engineering (Expected 2028)

2024 – Present

Faculdade de Ciências da Universidade do Porto

CERTIFICATIONS

Introduction to Model Context Protocol — Anthropic

2026

SKILLS

Languages: Python, JavaScript, HTML, CSS, C, MATLAB;

Frameworks & Tools: React, FastAPI, Electron, Vite, Node.js, SQLite, Git;

Infrastructure: Linux, Proxmox, Tailscale, systemd, GitHub;

Spoken Languages: Portuguese (native), English (C1).

ACTIVITIES

Erasmus+ Exchange Program

2021

Slovenia — week-long international program focused on cross-border collaboration with participants from across Europe.
